15 - FINANCIAL INSTRUMENTS, FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES AND FINANCIAL RISKS

Fair value

The following methods and assumptions were used to determine the estimated fair value of each class of financial instruments.

The fair value of the financial assets held for trading, the trade accounts receivable and other receivables and the accounts payable and accrued liabilities approximates their carrying amount given that they will mature shortly.

The fair value of the banker's acceptances is based on the published market price.

The fair value of the term loan and the obligations under capital leases is determined by discounting future cash flows using rates that the Company could use for loans with similar terms and conditions and maturity dates. The fair value of these long-term debts, assuming an interest rate of 7%, does not differ significantly from the carrying amount.

Risk management objectives and policies

The Company is exposed to various financial risks resulting from both its operation and its investment activities. The Company's management manages financial risks.

Financial risks

The various financial risks the Company is exposed to and the financial risk management policies are detailed below:

The Company's management considers that all the above financial assets that are not impaired are of good credit quality.

In the normal course of its operations, the Company evaluates the financial condition of its customers on an ongoing basis.

As at March 31, 2009, the Company had, with a well-known financial institution, \$425,944 in cash (\$230,216 as at June 30, 2008), \$249,999 in banker's acceptance (\$500,000 as at June 30, 2008) and a term deposit of \$504,136 (\$504,136 as at June 30, 2008). Management considers this financial institution to be low risk of loss.

Interest rate risk

The Company's exposure to the interest rate risk is detailed as follows:

The term deposit, the banker's acceptances, the term loan and the obligations under capital leases bear interest at a fixed rate and the Company is, therefore, exposed to the risk of changes in fair value resulting from interest rate fluctuations.

The bank loan bears interest at a variable rate and the Company is, therefore, exposed to the cash flow risks resulting from interest rate fluctuations.

Management considers that fluctuations of the interest rates would not have a material impact on the results of the Company.

Liquidity risk

The Company manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as forecast cash inflows and outflows due in day-to-day business. The Company establishes budget and cash estimates to ensure it has the necessary funds to fulfil its obligations.

As at March 31, 2009, the Company's liabilities have contractual maturities (including interest payments where applicable) as summarized below:

18 - EFFECT OF NEW ACCOUNTING STANDARDS NOT YET IMPLEMENTED

Goodwill and Intangible Assets

In February 2008, the CICA published new Section 3064, "Goodwill and Intangible Assets", to replace Section 3062, "Goodwill and Other Intangible Assets". Publication of this new section resulted in the withdrawal of Section 3450, "Research and Development Costs", as well as a number of consequential amendments to certain recommendations of the *CICA Handbook*. The new section establishes standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets by profit-oriented enterprises. This new section is effective for fiscal years beginning on or after October 1, 2008 and the Company will implement it as of July 1, 2009. The Company's management is not able to assess the impact that application of this new section will have on the financial statements.
