WANTED Tech Releases

Next Generation Online Employment Market Dashboard

WANTED Analytics™ 2.0 provides ultimate flexibility in Employment Market intelligence

Quebec City, Quebec – September 24, 2008. WANTED Technologies, (TSX-V: WAN), www.wantedtech.com, the leading source of on-demand intelligence for the employment marketplace, has released the latest version of *Analytics™*, the most widely-used online dashboard for employment market intelligence. Recruiting services and advertising salespeople use *Analytics™* to increase sales revenue by identifying hundreds of thousands of companies using online job boards to source candidates.

“*Analytics™* enables our users to find what they are looking for more quickly, which helps them increase revenues for their organizations,” said Bruce Murray, WANTED’s President and CEO. “It is an online window into a searchable database of millions of job ads posted on more than 1,000 websites each week.”

Each week, companies in the US and Canada post more than two million unique job ads online. WANTED gathers this data and organizes it by Company, Location, Job Title, Job Ad Volume and Industry. Clients can then query this database to: identify high-potential prospect to increase sales; chart and view competitive market share trends; assess Occupational- or Industry-specific demand for new employees; and follow the hiring behavior of individual companies or entire industry sectors in the economy.

“We’ve built flexibility into the *Analytics™* interface, so clients can see what they want and only what they want, when they want it,” said Murray. “We are using as many of the advanced, “software-as-a-service” features of the Internet that we can, to provide maximum capability to our clients.”

Samples of the features in the latest WANTED *Analytics™* online dashboard are available at: www.wantedtech.com.

About WANTED Technologies Corporation

[WANTED Technologies](#) provides online data, intelligence and analytical solutions focused on the employment marketplace in the United States and Canada. Its clients include firms in the media, employment services and financial services sectors.

Founded in 1999, WANTED Technologies has developed proprietary web-crawling and data transformation technologies to capture and analyze on a weekly basis more than three million jobs advertised online. The company integrates this data with multiple third party data sets to create proprietary information products. These products include economic trend analyses, competitive and market intelligence, scored sales leads, custom data feeds and analytical reporting services.

WANTED Technologies is also the exclusive data provider for The Conference Board's Help-Wanted Online Data Series™, a monthly economic indicator of job availability in the United States.
