WANTED Technologies Extends Agreement with Major Client

-WANTED's Proven Solution to be Integrated into Monster's In-house Business Intelligence Platform-

QUEBEC CITY, Quebec (February 24th, 2009) - WANTED Technologies Corporation (TSX-V: WAN), the leading source of on-demand intelligence for the employment marketplace, announced today that Monster Worldwide Inc. has licensed WANTED *Analytics™ 2.0*, the latest version of the company's online dashboard. WANTED *Analytics 2.0* will be integrated into Monster's in-house business intelligence platform, for use by Monster's sales force.

Monster and WANTED have been working together since 2003. WANTED *Analytics 2.0* helps organizations like Monster increase sales force effectiveness by providing relevant and comparative data in one view, thus focusing efforts on high probability selling situations that will result in greater sales volume per client. WANTED *Analytics 2.0* has sophisticated filtering and charting capabilities, enabling users to pre-define and retrieve sales opportunities, such as prospects sorted by number of healthcare openings or ad volume over a given time.

"WANTED's focus on actionable business intelligence solutions has made them a great fit for us," said Jeff Quinn, senior director of research, Monster. "Our decision to continue our relationship with WANTED and their *Analytics 2.0* product builds upon the work that our organization has done with WANTED."

"Since 2003, WANTED and Monster have enjoyed a productive, long-term relationship," said Bruce Murray, president and CEO of WANTED. "We're delighted Monster has chosen WANTED *Analytics 2.0*, which will fully leverage the power of the data we're providing in a manner that will be quickly adopted by their sales force."

About WANTED Technologies Corporation

[WANTED Technologies](#) provides online data, intelligence and analytical solutions focused on the employment marketplace in the United States and Canada. Its clients include firms in the media, employment services and financial services sectors.

Founded in 1999, WANTED Technologies has developed proprietary web-crawling and data transformation technologies to capture and analyze on a weekly basis more than three million jobs advertised online. The company integrates this data with multiple third party data sets to create proprietary information products. These products include economic trend analyses, competitive and market intelligence, scored sales leads, custom data feeds and analytical reporting services.

WANTED Technologies is also the exclusive data provider for The Conference Board's Help-Wanted Online Data Series™, a monthly economic indicator of job availability in the United States.
