WANTED Technologies Releases New Human Capital Workflow Apps on its WANTED Analytics™ Apps Platform

WANTED's Employer Listing App and Contact Listing App offer real-time access to employers, hiring contacts, and users' LinkedIn® connections to those employers, by industry or occupation.

Quebec City, Quebec – May 6, 2010. WANTED Technologies, (TSX-V: WAN), www.wantedtech.com, the leading source of real-time employment market information, today announced the launch of the *Employer Listing App™* and the *Contact Listing App™* on its WANTED Analytics™ Apps platform. Clients in the media, HR/staffing and government sectors use WANTED Analytics Apps to prioritize sales opportunities, identify economic trends, and analyze competitive market conditions.

"The *Employer Listing App* gives users an efficient way to find employers fast by building lists of high priority business targets and creating regular sales lead feeds," said Bruce Murray, WANTED's President and CEO. "With one click, users can then access that employer's hiring contacts in the integrated *Contact Listing App*, including all contact information in WANTED's database of over 500 million online job ads, any Dun & Bradstreet information, and contacts within the user's own LinkedIn® connections."

The *Employer Listing App* and *Contact Listing App* are part of the WANTED Analytics Apps family of applications available at www.wantedanalytics.com. Clients can search for current job openings in real-time or research historical job openings to better understand the employment marketplace.

WANTED's Analytics Apps are an integrated set of applications that focus on the Human Capital marketplace. They include data and analysis on Hiring Demand and Labor Supply, both sides of the transactions that occur in the employment marketplace. WANTED's proprietary web spidering software and analytical tools aggregate and organize data from multiple online and offline sources. These include data on more than 2.5 million job openings each week, and on candidates whose profiles are accessible online. WANTED integrates this information into a centralized data warehouse and provides clients with analysis and interpretations of the data via a web-based

interface. The analysis of both the Demand and Supply side of the market helps clients make better decisions to increase sales or improve the quality of their workforces.

“Our WANTED *Analytics Apps* are an integrated set of applications that provide multiple ways of looking at what is taking place in the Human Capital marketplace,” said Murray. “This platform links multiple applications to a common underlying set of data and provides a consistent view of the market.”

Samples of WANTED *Analytics Apps* can be found at www.wantedanalytics.com.

About WANTED Technologies Corporation

WANTED is the leading source of real-time employment market information. The company provides insight and intelligence via its family of WANTED *Analytics™ Apps* found at www.wantedanalytics.com. Clients in the media, HR/staffing and government sectors use WANTED *Analytics Apps* to prioritize sales opportunities, identify economic trends, and analyze competitive market conditions.

WANTED is also the exclusive data provider for The Conference Board’s Help-Wanted OnLine Data Series™, the monthly economic indicator of Hiring Demand in the United States.

WANTED Technologies (TSX-V:WAN) was founded in 1999. The company’s headquarters are in Quebec City, Canada, and it maintains a US-based subsidiary with primary offices in New York City. The company began collecting detailed Hiring Demand data in October 2002, and currently maintains a database of more than 500 million unique job listings. To sample WANTED’s services, visit www.wantedanalytics.com. For more information about how WANTED helps organizations make better decisions and improve sales results, visit www.wantedtech.com.
